dashboards

Policies due  
for renewal

## FEATURES

- **Google Maps Enabled Risk Locator**

Google Maps enabled risk locator that enhances underwriting and enables a review of location-based risk aggregation.

- **Reinsurance Treaty Limits**

Manage reinsurance treaty limits and risk class levels with a treaty allocation engine. The outward reinsurance functionality enables allocation and validation of treaty limits, flagging up any excess from the stage of the quotation.

- **Claims Provisioning**

Seamless claims provisioning for settlements against different reserves – partial, part and final or full and final settlements.

- **Swiss Re CatNet®**

CatNet® offers client a wide range of proprietary geo risk tools that are specially designed to provide swift overviews and assessments of natural hazard exposures.

- **Single Page Dashboard View**

Single Page Dashboard view of all transactions that include policy, endorsement history, claims allocations, reinsurance policy, reinsurance treaty setup and accounting entries.

- **Intelligent Search Engine**

Intelligent Search Engine that captures information such as quotations, claims, policy details and reinsurance.
