## ANOUD TECHNOLOGIES

We Ensure. You Insure.

# The Anoud⁺ Advantage: Exclusive Features

## Google Maps Enabled Risk Locator

Enhance underwriting and enable review of location-based risk aggregation with Google Maps.

## Reinsurance Treaty Limits

Manage reinsurance treaty limits and risk class levels with a treaty allocation engine. The outward reinsurance functionality enables allocation and validation of treaty limits, flagging up any excess from the stage of the quotation.

## Claims Provisioning

Provide seamless claims provisioning for settlements against different reserves including partial, part and final, or full and final settlements.

## Swiss Re CatNet®

Offer clients a wide range of proprietary geo-risk tools with CatNet®, especially designed to provide swift overviews and assessments of natural hazard exposures.

## Single-page Dashboard View

Access a single-page dashboard view of all transactions, including policy, endorsement history, claims allocations, reinsurance policy, reinsurance treaty setup, and accounting entries.

## Intelligent Search Engine

Capture information such as quotations, claims, policy details, and reinsurance with an intelligent search engine.
